

P. First digit !

time limit per test: 0.25 seconds🕒
memory limit per test: 64 megabytes
input: standard input
output: standard output

Given a number X . Print "EVEN" if the first digit of X is **even number**. Otherwise print "ODD".

For example: In **4569** the first digit is **4**, the second digit is **5**, the third digit is **6** and the fourth digit is **9**.

Input

Only one line containing a number X ($999 < X \leq 9999$)

Output

If the first digit is even print "EVEN" otherwise print "ODD".

Examples

input	Copy
4569	
output	Copy
EVEN	

input	Copy
3569	
output	Copy
ODD	

Note

Second Example :

In **3569** the first digit is **3** and its ODD.

→ About Time Scaling

This contest uses time limits scaling policy (depending on a programming language). The system automatically adjusts time limits by the following multipliers for some languages. Despite scaling (adjustment), the time limit cannot be more than 30 seconds. Read the details by the [link](#).

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
