

K. Max and Min

time limit per test: 0.25 seconds🕒
memory limit per test: 64 megabytes
input: standard input
output: standard output

Given 3 numbers A, B and C , Print the **minimum** and the **maximum** numbers.

Input

Only one line containing 3 numbers A, B and C ($-10^5 \leq A, B, C \leq 10^5$)

Output

Print the **minimum** number followed by a single space then print the **maximum** number.

Examples

input	Copy
1 2 3	
output	Copy
1 3	

input	Copy
-1 -2 -3	
output	Copy
-3 -1	

input	Copy
10 20 -5	
output	Copy
-5 20

→ About Time Scaling

This contest uses time limits scaling policy (depending on a programming language). The system automatically adjusts time limits by the following multipliers for some languages. Despite scaling (adjustment), the time limit cannot be more than 30 seconds. Read the details by the [link](#).

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.

Start virtual contest
